### DETAILS

The Milton intelligent bidet seat offers fully customizable rear and front cleansing options. Additional oscillating, pulsating massage and aerated bubbly water infusion technology are just a few of the customizable features you can personalize and program into your Milton intelligent bidet. Unlike clunky bidet models that require tank water heating systems, the Milton intelligent bidet seat features instant water heating technology to reduce your water demands while ensuring a luxurious and comfortably warm bidet cleansing experience. This instant heating technology also lends its space-saving benefits to the Milton's slim, modern design.
