WISDOM FOR LIFE

WONDER IS THE BEGINNING OF WISDOM

WISDOM FOR LIFE

In every epoch, there are individuals of vision, free-spirited antagonists, with an unyielding passion to explore the new and unexpected. Their thinking is broad, their eyes are set on the horizon, not just on what is right in front of them. AXENT embodies this spirit. A belief in the principle of delivering simplicity out of complexity derives from an inherent ability to create products using knowledge, experience, common sense and insight. AXENT is passionate about technology committed to innovative design.

THE ORIGIN OF AXENT TOWN OF ROSES

AXENT Switzerland was founded in Rapperswil, Switzerland, also known as the "Town of Roses". The region has developed to be the center of modern European sanitary industry. In fact, the first shower toilet was invented here way back in 1957.

This is where AXENT began our journey of focusing on our craftsmanship, research and development and adapting the newest in sophisticated technology to becoming the pioneer in the global bathroom industry.

WE NEED TO REVOLUTIONIZE THE INDUSTRY

I continually strive to shape the way the sanitary industry evolves in my home country of Switzerland, in Europe, and throughout the world. About 10 years ago I was looking for a new professional challenge when I met an extraordinary entrepreneur in Chicago. His name was Frank Li and together we decided to take a fresh look at the bathroom industry we were both so passionate about. This common interest combined with our shared vision to explore and create a new and unexpected bathroom standard is the driving force behind the foundation of AXENT.

After months of intensive research and development, countless stress tests and numerous engineering innovations, the AXENT.ONE intelligent toilet, along with its multi-functional control button, were introduced to the world.
