SURFACE CLEANING

This product has been designed and manufactured with great care and attention to detail. If you follow a few simple cleaning instructions you will be able to enjoy its comfort, quality and beauty for many years to come.

CLEANING INSTRUCTIONS SEAT, LID AND BACK COVER

Use a mild soap solution to clean the seat and please take care that the seat and hinges are not left damp. Dry off any residual water or cleaning agents with a soft cloth. Avoid contact of the seat and hinges with abrasive, corrosive or chlorine-based cleaners, as these may cause damage or lead to flash rust. When cleaning the bowl, make sure that the seat and cover are kept in an upright position until all cleaning agent has been flushed away.

CLEANING INSTRUCTIONS CERAMIC

Under no circumstances should you use harsh or abrasive cleaning substances such as abrasive cream cleansers, scouring powder or drain cleaner on your ceramic surfaces. Also avoid using steam cleaners and hard, abrasive sponges.

The use of acidic cleaners with a pH value between 1 and 4 is highly recommended. Cleaners with a pH value in the neutral range (5 to 8) are not always suitable. We strongly advise against using either weak or strong alkaline cleaners, i.e. substances with pH values from 9 to 12.

CLEANING THE INTAKE FILTER

The intake filter may be detached and cleaned with soap and water as shown on the left.

When the water flow is less than normal, please clean the filter. Assure that the angle valve is shut off during cleaning.

To reassemble, please put the filter back in reversed sequence after cleaning it.
